Changing Habits

Dabbling with Technology

Doing Old Things in Old Ways

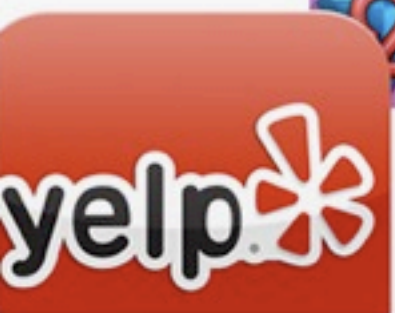

Doing Old things in New Ways

Doing New Things in New Ways

500 million apps downloaded.
And counting.

There are more than 15,000 apps on the App Store, and so far iPhone users have downloaded an incredible 500 million, in every category from games to business.

Where is your school?

1. Is the technology being used “Just because it’s there”?
2. Is the technology allowing the teacher/students to do
Old things in Old ways?
3. Is the technology allowing the teacher/students to do
Old things in New ways?
4. Is the technology creating new and different learning
experiences for the students?

Video: Courage a Documentary

Substitution:

the computer substitutes for another technological tool, without a significant change in the tool's function.

Augmentation:

the computer replaces another technological tool, with significant functionality increase.

Modification:

the computer allows for the redesign of significant portions of a task to be executed.

Redefinition:

the computer allows for the creation of new tasks, inconceivable without the computer.

the computer allows for the creation of new tasks, inconceivable without the computer.

It's not a tool set

It's a mind set
